 Pavan Sai Kushana

PROFILE INFO

Experienced AWS intern with 1.4 years of hands-on cloud management experience, skilled in Python, shell scripting, Linux OS, databases, Git, GitHub, and various AWS services. I am seeking an opportunity to leverage my technical expertise and practical experience in the field of data engineering, contributing effectively to innovative projects and advancing my career.

EXPERIENCE

November 2022 - February 2024

Sears Holding India, Hyderabad.

AWS Cloud Intern

- Assisted in resolving AWS access issues, IAM policies, managing user permissions, roles, and MFA, contributing to a more secure access control environment.
- Supported provisioning, maintenance, and configuration of EC2 instances, aiding in system performance and security improvements.
- Helped monitor and troubleshoot EKS clusters, performing node and pod status checks to ensure system reliability.
- Managed user accounts and permissions on Linux servers, including system updates and security patches, improving operational efficiency.
- Facilitated access management for AWS services and GitHub, assisting with Okta integrations and permissions, and enhancing user access processes.
- Contributed to the setup and configuration of OpenVPN for remote users, improving secure remote connectivity.

April 2022 - June 2022

Salesforce, Remote.

Administrator

- I Completed a 2-month Salesforce Virtual Internship as an Administrator, demonstrating proficiency through completing Salesforce Trailhead modules and super badges as project requirements.
- Trailhead: <https://www.salesforce.com/trailblazer/pkushana>

REFERENCE

- AWS Certified Cloud Practitioner [CLF - CO2], **AWS**.
- Programming with Python 3.X, **Simplilearn**.
- Salesforce Administrator Virtual Internship, **Salesforce**.
- TCS iON Career Edge – Young Professional, **TCS**.

EDUCATION

October 2020 - June 2023

Institute of Aeronautical Engineering

Bachelor of Technology in **Information Technology**. **CGPA: 8.13/10.0**

SKILLS

- AWS Services: IAM, EC2, S3, RDS, Lambda, Route 53.
- Programming Languages: C, Python, Shell scripting.
- Database engines: MySQL, Oracle database.
- Operating systems: Windows, Linux (CentOS, Ubuntu).
- Others: Git, GitHub, MS-Office.
